Power Unit for Impressed Current Cathodic Protection

Digital technology ensures superb reliability and provides flexibility to meet the requirements of today's ship owners in the most efficient and cost effective manner:

Features of the power unit include

- Full micro-processor control
- Automatic operation with manual over-ride facilities
- Data recording automatically, eliminating daily records
- Intelligent anode current limiting, preventing over protection
- Internal maintenance and diagnostics
- Intuitive control with digital display
- Anode fuse failure and protection indicators
- Durable steel cabinet manufactured as IP 44 as a minimum
- Fully compliant and certified to BS1597:1985 and BS7027:1990 for EMC/RFI
- 0.1% ripple at full rated output
